Jeff, sorry I haven't gotten back- been on a conference call all day. Will you still be around at 4:15? If so, I'll come find you. If not, first thing tomorrow?

Adrea,

Can you help us gain access to the "L" Drive?

Please see the email thread below originating with Jim Martin.

Thanks,

Don and Greg- I need your help. Apparently Greg Oberley was working with someone in ISP to get access to, I believe, the L drive where all of the rounds of Pavillion groundwater data are stored. He is out of the country for 2 weeks and we urgently need to get our contractor working with the data. Do you know

who Greg might have been working with and where this request might stand at this point?

Ayn,

ESAT is standing by. As soon as we can get the data, they will get on it. Greg was working on some technical issues I believe with IT to gain access to the network drive where the data is stored.

Greg, do you have any report on this? Martin and I will have to work with Tony's staff this week to ensure this gets done asap. Jeff, I think you were the one working with the contractors on this- we will need to get a status report and to see how quickly this can be completed.

Ayn -- I know you, and probably our contractors are pressed, but it is really, really important that we develop a single document with all of the data and all of the data qualifiers for the various Pavillion investigation phases.

It is getting harder and harder for me to explain that this is not yet done.

Can we expedite this? Do you need more resources?

Jim
